DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Nimmagadda (US 20020093985).

Regarding claims 1-6, Nimmagadda discloses a method, comprising: executing a service selection method on an off load processor of a computing system to select an available network service for handling traffic sent to/from a handheld device, said executing being performed while a main CPU of said computing system is in a low power state, discovering that said available network service is available within said computing system's present environment prior to said handling. Nimmagadda also discloses selecting further comprises selecting said available service because it has a lowest cost metric amongst a plurality of available network services, and selecting said network service according to a pre-determined policy. See paragraphs 84-86 and 102-104.
